

# **The DC Cohort: A Population-based Study to Monitor and Improve Care and Clinical Outcomes among PWH in DC**

**Amanda D. Castel, MD, MPH**  
**DC Cohort Principal Investigator**

**Anne K. Monroe, MD, MSPH**

**Milken Institute School of Public Health, George Washington University**

**January 31, 2023**

# Agenda

- ▣ DC Cohort study overview
- ▣ Highlight available data and data sources
- ▣ Outline processes for working with Cohort data for CFAR Pilot awards

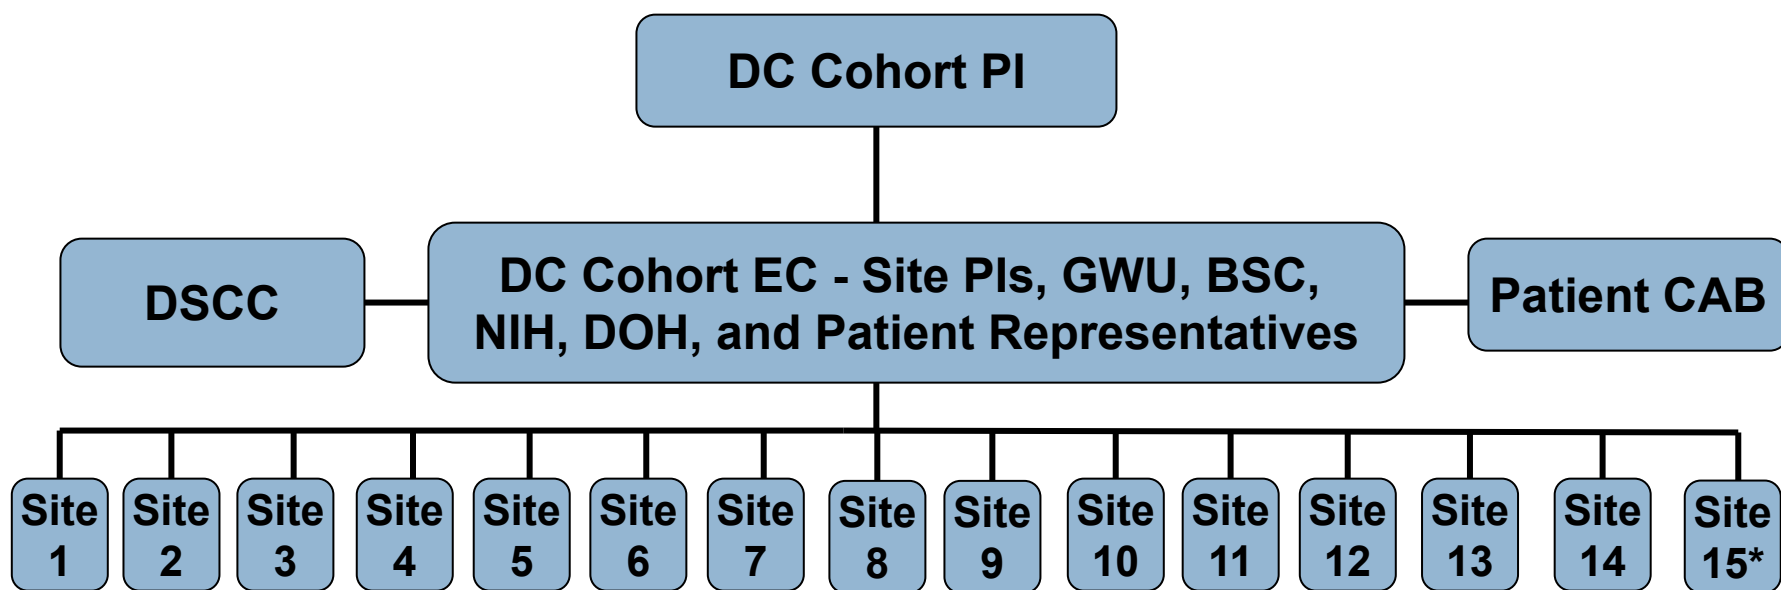

# What is the DC Cohort?

- NIH funded: CTU (2009-2020), R24 (2020-2025)
- Longitudinal database of consenting PWH receiving outpatient care at 14 clinics in DC that contains information on:
  - Risk factors, diagnoses, lab results, treatments and procedures
  - Baseline data extraction followed by monthly EHR extractions into a centralized database
- City-wide initiative with academic, community and government clinics
- One of the largest HIV cohorts to date (>12,000 participants)
- Close collaboration with DOH to improve the completeness of information through periodic data linkages

# DC Cohort Clinics by EMR and Clinic Type

Clinic	EMR and Year of Implementation	Clinic Type
DC Veterans Affairs Medical Center	Vista-CPRS, 1994	Federal Hospital
Georgetown University	Cerner, 2016	Academic Hospital
Whitman-Walker Health	eClinical Works, 2008	Community Based/FQHC
GWU Medical Faculty Associates	Epic, 2021	Academic Hospital
Family and Medical Counseling Service	eClinical Works, 2008	Community Based/FQHC
Washington Hospital Center	Cerner, 2016	Hospital
Children's National Health System Pediatric Clinic	Cerner, 2016	Academic Hospital
Howard Univ. Hosp. Pediatric Clinic	Touchworks, 2009	Academic Hospital
Howard Univ. Hosp. Adult Clinic	Touchworks, 2009	Academic Hospital
La Clinica del Pueblo	eClinical Works, 2008	Community Based/FQHC
Metro Health	eClinical Works, 2012	Community Based
Unity Health Care	eClinical Works, 2009	Community Based/FQHC
Washington Health Institute	eClinical Works, 2013	Hospital
Kaiser Permanente	Epic, 2004	Non-profit

# DC Cohort Organizational Structure

*\*CNH Adolescent Clinic- closed in 2020*

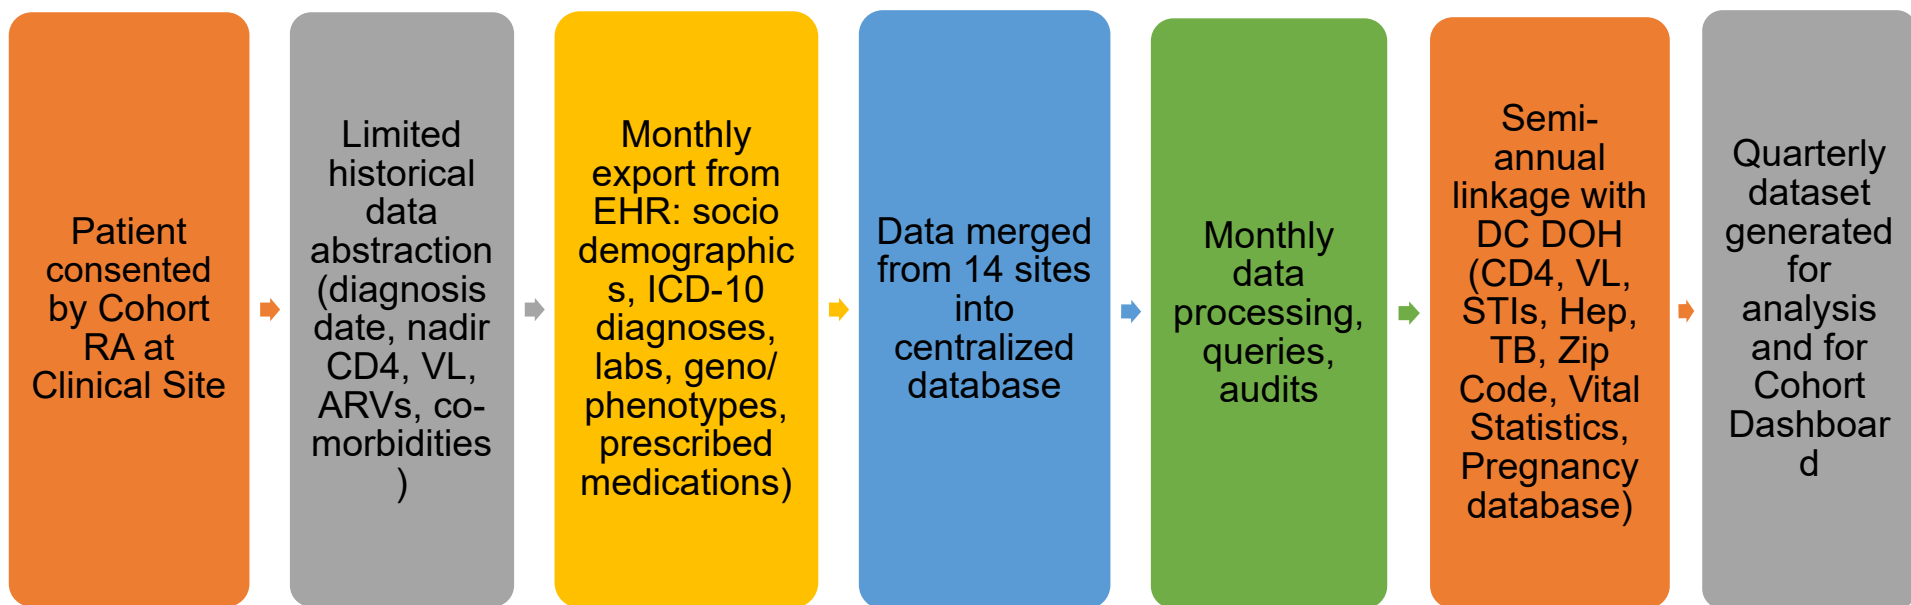

PFAP: Partnership for AIDS Progress

EC: Executive Committee

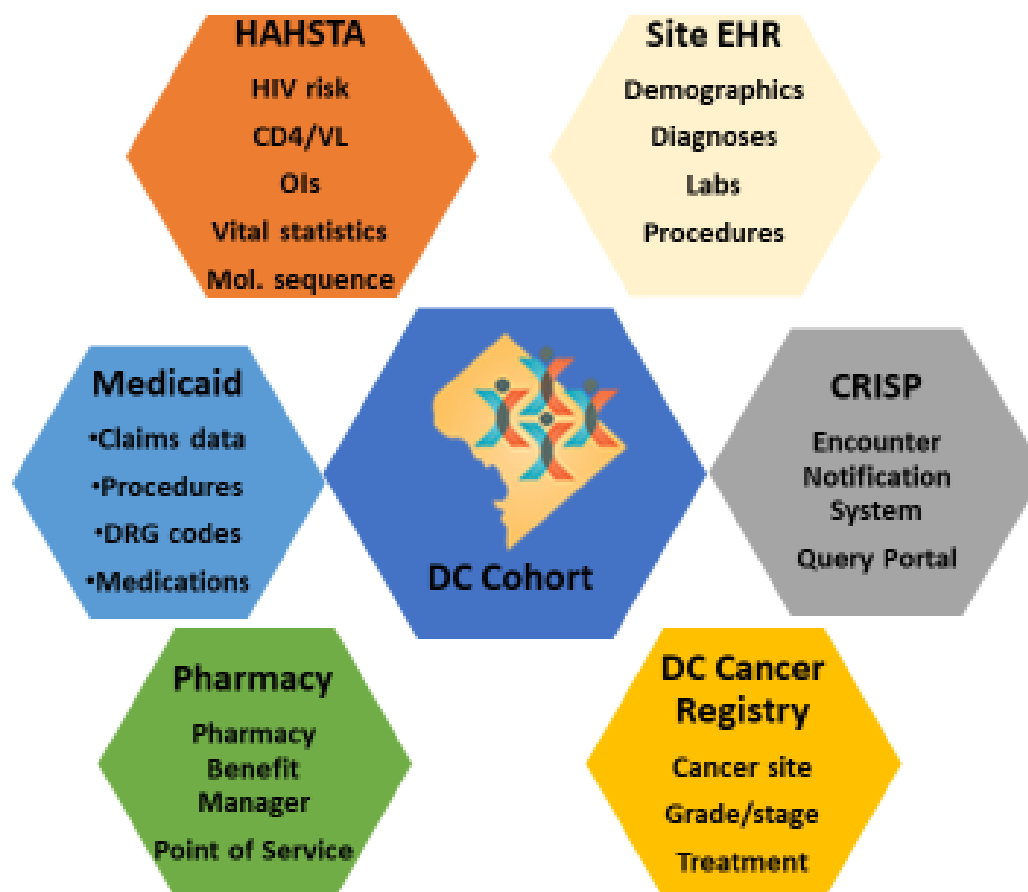

DSCC: Data and Statistics Coordinating Center

CAB: Community Advisory Board

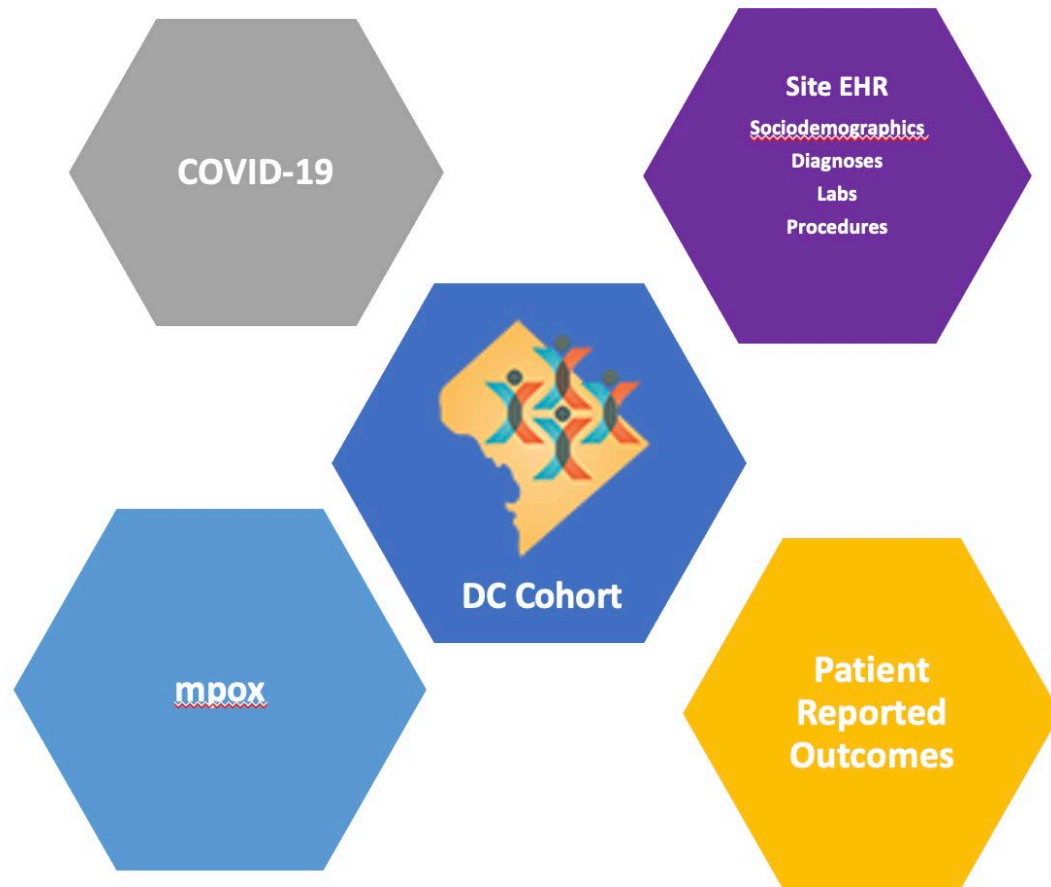

# DC Cohort Consent and Data Flow

# DC Cohort Data Linkages (in Progress)

# DC Cohort Existing Data Linkages

# DC Cohort as a Platform for Substudies (1)

- ▣ **Molecular Epidemiology** data collection completed 11/2020
  - ▣ Characterize phylogenetics, transmission patterns and behavioral risks for transmission among PWH (N=218)
- ▣ **Patient Reported Outcomes** (PI: Monroe)
  - ▣ Gathering patient reported data to complement EHR abstraction with a focus on mental health and substance use (all participants annually)
- ▣ **Positive Links R01** (PI: Castel, Ingersoll (UVA))
  - ▣ Cluster randomized trial of an mHealth app to improve retention in care and viral suppression (N=560)

# DC Cohort as a Platform for Substudies (2)

- ▣ **Impact of COVID-19 on PWH** (NIH COVID-19 Supplement)
  - ▣ Cross-sectional survey via REDCap to assess incidence and impact of COVID-19 among PLWH (goal N=4,000)
  - ▣ **mpox survey** questions added in August 2022
- ▣ **HIV and aging** (PI: Monroe, CFAR supplement)
  - ▣ Funding to support research on polypharmacy/potentially inappropriate prescribing among older PWH
- ▣ **Implementation of Brain Health Screening** (PI: Gondre-Lewis, DC CFAR Supplement)
  - ▣ Funding to support research on brain health screening and referral among PWH across select Cohort sites

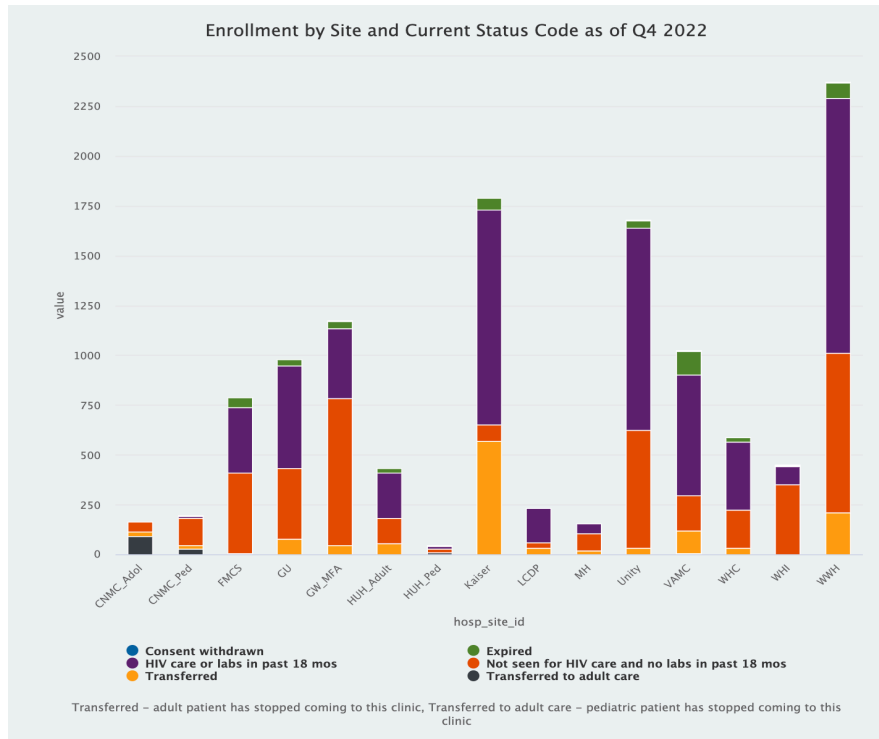

# Enrollment Progress as of November 30, 2022

Cumulative Enrollment in the DC Cohort as of November 30th, 2022				
Site	Total Estimated Patients	Consented	Refused/ Withdrawn*	Undecided
Veterans Affairs Medical Center	1,300	1,016	131	105
Georgetown University	1,233	976	111	93
Whitman-Walker Health	3,795	2,368	416	239
George Washington Medical Faculty Associates	1,800	1,170	368	170
Washington Hospital Center	1,012	604	190	84
Family and Medical Counseling Service	880	766	79	18
Children's National Hospital Adolescent Clinic*	200	169	22	2
Children's National Hospital Pediatric Clinic	270	202	42	29
Howard University Hospital Pediatric Clinic	45	45	0	0
Howard University Hospital Adult Clinic	600	432	93	87
MetroHealth	280	152	44	56
La Clinica del Pueblo	577	242	28	26
Unity Health Care	2,500	1,688	358	210
Washington Health Institute (formerly Providence Hospital)	810	434	51	67
Kaiser Permanente Mid-Atlantic	1,790	1,790	0	N/A
<b>TOTAL</b>	<b>17,092</b>	<b>12,054</b>	<b>1,933</b>	<b>1,186</b>

\*Total of 38 withdrawals as of November 30th, 2022

\*Children's National Hospital Adolescent Clinic is no longer open for enrollment

# DC Cohort Clinical Dashboard

Dashboard data as of Q4 2022

# DC Cohort Demographic Characteristics through June 30, 2022 (N=6,273 active participants)

Characteristic	n	%
Age (median, IQR)		56 (45, 63) years
Race (NH Black)	4,737	75.5
Gender (Male)	4,473	71.3
HIV Transmission Risk Factor		
MSM	2,507	40.0
HRH	2,079	33.1
IDU	333	5.3
Perinatal	56	0.9
ARV experienced at baseline	5,786	92.2
Baseline co-morbidities		
Hypertension	1,955	31.2
Mood disorder	1,611	25.7
Hepatitis C	910	14.5
Diabetes	730	11.6
Hepatitis B	241	3.8
Characteristic	median	IQR
Length of HIV diagnosis in years at enrollment	9.2	(4.2, 16.0)
CD4 cells/ $\mu$ l (most recent)	662	(452, 893)
VL copies/ml (most recent)	20	(20, 40)

# Uses of DC Cohort Data

- Longitudinal data available on >6K active participants from 14 sites
- Approximately 64,980 person-years of data
- 42 publications to date
  - ▣ 7 manuscripts currently under review/revise and resubmit
  - ▣ >20 additional projects in progress
- Cohort data used for 4 doctoral dissertations (2 pending), and numerous MPH students

# Using the DC Cohort to Describe Care Among PWH in DC

# COVID and mpox Studies

## □ COVID

- Risk of Severe COVID-19 and Service Utilization (*AIDS & Behav*, 2022)
- Impact of COVID on the HIV Care Continuum (CROI, 2022)
- COVID-19 Incidence (IAPAC Adherence 2022)
- Vaccine Hesitancy and Uptake (under review)
- Long COVID

## □ Mpox

- Knowledge, Behavior Change, and Vaccine Uptake (CROI, 2023)

# Potential Future Scientific Focus Areas

- ❑ Cancer diagnoses
- ❑ STIs and public health interventions focused on reducing HIV risk
- ❑ Health disparities among DC Cohort participants
- ❑ Interventions to improve metabolic disease outcomes
- ❑ Contraceptives and reproductive health in women
- ❑ Opportunistic Infections
- ❑ CNS HIV Complications (neurocognitive dysfunction, cerebrovascular complications)
- ❑ Medication adherence/persistence
- ❑ Cost effectiveness of different HIV care delivery models
- ❑ Pediatric/Adolescent: care trajectories (historically high rates of mortality after transfer to adult care); adolescent care continuum; mental health and substance use among adolescents

# Unique DC Cohort Features

- ❑ Automated electronic data capture
- ❑ Population-based longitudinal sample
- ❑ Inclusion of PWH from pediatrics to geriatrics
- ❑ Diversity of academic, hospital-based and community-based clinics
- ❑ Unique Cohort-DOH database linkage
- ❑ Quality of Care Clinical Dashboard
- ❑ Public health and research resource

# DC Cohort and Related Data Sources

# Patient reported outcomes (PROs)

	Instrument
<b>MH screening questionnaires</b>	
Depressive symptoms	PHQ-8
Post-traumatic stress disorder	PTSD screen primary care
Anxiety	GAD-7
<b>Self-reported substance use</b>	
Unhealthy alcohol use	AUDIT
Substance use (substances assessed: cannabis, cocaine, amphetamines, inhalants, sedatives, hallucinogens, opioids)	ASSIST
<b>Antiretroviral medication adherence</b>	
Adherence assessment	ACTU-4
<b>Quality of Life</b>	
QOL questionnaire	EuroQoL 5 Dimensions 3 Levels (EQ-5D-3L)
<b>Social determinants of health (SDOH)</b>	
	Accountable Health Communities screening
<b>Symptoms</b>	
	The Memorial Symptom Assessment Scale-Short Form (MSAS-SF)
<b>Stigma</b>	
	4-item internalized HIV stigma scale

# PROs Data collection

- ▣ 869 participants have been enrolled from May 2021 through December 31, 2022
- ▣ Annual PROs survey rollout began May 2022
  - ▣ 118 annual surveys have been completed thus far

# COVID survey domains

- ▣ Healthcare access
- ▣ Pre-existing medical conditions
- ▣ Household contacts
- ▣ COVID-19 symptoms and testing
- ▣ Impact of COVID-19
- ▣ Risk perceptions related to COVID-19
- ▣ Mental health symptoms
- ▣ Tobacco product use
- ▣ Sexual risk behaviors
- ▣ COVID-19 stigma
- ▣ ART adherence
- ▣ Telehealth

# COVID survey data collection

## □ COVID

- ▣ 1,912 participants have been enrolled since December 31, 2022
  - Will continue data collection through May 2023
- ▣ 30 out of 122 (25%) long COVID surveys have been completed

# Mpox survey domains

- ▣ Mpox awareness and information sources
- ▣ Vaccination status
- ▣ Exposure, infection, and treatment
- ▣ Worry about mpox and behavioral modifications
- ▣ Negative impact of mpox outbreak

# Mpox survey data collection

- Mpox questions added in August 2022 on awareness, information sources, vaccine uptake, behavior change, and negative impacts
- 229 participants have completed the mpox survey questions as of January 15, 2023

# DC Cohort Pilot Study Collaboration Process

# General Guidelines for Concept Sheet and Data Request Submissions

- ❑ Data dictionaries available upon request
- ❑ Data request and concept sheets available on DC Cohort website
- ❑ Data use agreements are required for investigators
- ❑ DSCC analytic staff and DC CFAR biostatisticians are available to work with investigators/analysts
- ❑ All Cohort-wide concepts are reviewed, approved, and prioritized by the DC Cohort Executive Committee
- ❑ DC Cohort website: <http://go.gwu.edu/dccohort>
