

Epidemiological Resources

1. AIDSvu
Interactive online mapping tool that visualizes the HIV epidemic on communities. Maintained by Emory University.
<https://aidsvu.org/>
2. ATLAS
CDC's interactive tool allowing users to create maps, charts and tables using nationwide HIV/AIDS and STD surveillance data.
<https://www.cdc.gov/nchhstp/Atlas/Index.htm>
3. DC Health Annual Epidemiology and Surveillance Report:
The Annual Surveillance Report for the District of Columbia presents a snapshot of the District's HIV, Sexually Transmitted Diseases (STDs), Hepatitis, and Tuberculosis (TB) complex epidemics. These data provide insight into how the DC Department of Health (DC Health) in partnership with community can continue to make progress for the health of District residents.

4. Health and Human Services, AHEAD: America's HIV Epidemic Analysis Dashboard
Online data visualization tool showing national and jurisdictional data on the six indicators being used to monitor our collective progress toward the overarching goals of the Ending the HIV Epidemic initiative. The dashboard provides the 57 EHE jurisdictions, the federal government, and other stakeholders the most up-to-date information available about EHE progress to help inform jurisdictional and national decision making.

5. HIV Policy Lab:
The HIV Policy Lab is a unique online dataset, data visualization platform, and reference library that systematically gathers and monitors HIV-related laws and policies in 194 countries, holding governments accountable for adopting the evidence-based policies needed to end AIDS. It is an open, growing global public resource that gathers data from legal documents, government reporting, and independent research developed in collaboration with the UN, civil society, and academic partners.
